

We are pleased to announce the release of version 5.06 of the Beacon Product Suite.

Version 5.06 Release Notes

Beacon Suite Updates

- Newly available Flow module for customizing, routing, and managing workflows within the Beacon Suite!
 - Contact us to learn more!
- Improved feedback option to send a message directly to a member of our Support team from within Beacon

Beacon HR Updates

- Planning records with a Depart date in the past will no longer throw a system error when viewing the position
- Users can now set the merge source on an existing planning record to N/A
- Resolved issue with the Awards Nomination Form caused by a blank Pay Period End Date
- Timekeeper number updated to download from it's new location at the official source
- Easier navigation of the Position Wizard when filling an existing Recruit or Vacancy
- Improved logic related to departing Fellow positions with a terminated or expired Award
- Improved Discrepancy report—A discrepancy in the Position CAN value will now display on the Official Compare button as well as the Discrepancy Report

Beacon Finance Updates

- Issue resolved - non-Admin users can again access Views tab
- Users can now update the Category of an existing projection
