We are pleased to announce the release of version 6.06.0000 of the Beacon Product Suite.

Version 6.06.0000 Release Notes

Beacon Dashboard Updates :
- New Card! "Positions with Mismatched NED/Beacon Supervisor Values" Track discrepancies between the NED Supervisor (Manager) and the Beacon HR user-entered supervisor.
- "Length of Service" card can now track the report on employees with 10+,20+,30+ years of service instead of reporting on employees with 10,20,30 years of service.

Beacon HR Updates:
- Improved column selector for the Positions screen and made definitions clearer.
- Position FY calculations now better handle for rare instances where past positions have a compensation date later than their departure.
- Column filter search no longer throws error for blank search.
- Contractor Screen now correctly shows the 'Is Telework Allowed" field.

Beacon Finance Updates:
- Improved tracking of how often past FYs are chosen in Finance.
- Transactions screen does a better job showing short versions of long descriptions. Full-length descriptions are shown on the individual transaction view.
- Export to Excel on Transactions screen better handles formatting long descriptions.
- "Last Week" and "Last Day" links now properly maintain your other selections, so you can use them when looking at a single account.

Beacon Flow Updates:
- Improved user experience and added numerous process efficiencies .
- Now featuring a full packet Review Process before routing workflow, catching errors before they become problems.
